Web Development   Object-Oriented Programming   Content Management Systems

Problem Solving   Time Management   Adaptability

EXPERIENCE

Software Developer - *Codeforte Systems*
March 2023 — Present

- Worked majority on the front-end of the web sites as part of the platform customer acquisition and retention team.
- Major features include taking control of development of the landing pages redesign, and of the promotion/competition upgrades. Both projects significantly improved the acquisition and retention of users.
- Worked on the development of an all-in-one internal tool that drastically decreased the time taken to create competitions and promotions, and other features used across the sites.
- Worked closely with other team members to improve the registration funnel which lead to a 32% increase in successful registrations.
- Collaborated with other teams to handle support issues/requests.
- Assisted in the launch of a new website, creating majority of the content management system content needed.
- Used React, Redux, VS Code, Jira, Bitbucket, Figma.

Junior Software Developer - *DiPAR Systems*
July 2021 — March 2023

- Built, and maintained efficient, reusable, and reliable code.
- Identified bugs and devised solutions to mitigate and address issues.
- Assisted development managers with technical analysis.
- Refactored and optimised new and existing code.
- Assisted debugging support issues on systems.
- Implemented unit testing to ensure functional code.
- Helped in mentoring team members with less experience.
- Formed part of the Scrum team and participated in the breakdown of requirements.
- Used AngularJS, jQuery, .Net, MS SQL Server, Visual Studio, Azure DevOps, Postman.

EDUCATION

Advanced Diploma: **Information Technology in Applications Development**
(NQF Level 7 (SA) / RQF Level 6 (UK))

Cape Peninsula University of Technology
2019 — 2022

- Achieved 11 Passes and 20 Passes with Distinction for the 31 subjects across the four years.
